

## Glass Tube Liquid Level Gauge Type 16/16, PN10

Glass tube indicator for installation on condensation tanks, reservoirs, fire sprinkler tanks, water supply tanks etc. According to TRD rules the indicators are not allowed to be installed at hot water plants, high pressure tanks and collecting vessels with a nominal overpressure > 1 bar (2 bar absolute).

### Connection

- male thread G 1/2" acc. DIN ISO 228
- drain plug and vent plug G 1/4" - acc. DIN 910

### Design

- connection piece made of stainless steel mat. 1.4571
- gaskets for glass tube made of PTFE Type M902DP
- indication tube made of glass (DURAN) (Ø 13,5x1,75mm)

### Additional Equipment

- glass protection: Plexi glass cover Ø 42mm  
(product temp: max. 80°C)
- visual aid: coloured float

### Dimensions

- length glass tube = CCD - 20mm
- length plexi protection cover = CCD - 30mm

Max operating pressure	<b>8 bar</b>
Max operating temp.	<b>200°C</b>

Max operating pressure	<b>10 bar</b>
Max operating temp.	<b>120°C</b>

design	connection thread
with drain plug and vent plug	G 1/2"

### NOTE

Maximum CCD is 1000 mm
